

Software Tester

Description

We are seeking a detail-oriented and experienced **Software Tester / QA Engineer** to ensure the quality, performance, and reliability of our applications built using **React, React Native, Node.js, MongoDB, and AWS**.

The ideal candidate will have strong expertise in **modern testing practices**, including **automation, performance testing, and AI-assisted testing**, and will work closely with developers, product managers, and DevOps teams to deliver high-quality, scalable software solutions.

Responsibilities

- Design, develop, and execute **comprehensive test strategies** (manual + automated)
- Build and maintain **end-to-end test automation frameworks using Playwright**
- Perform **API testing** (REST/GraphQL) and validate backend integrations
- Conduct **performance and load testing** to ensure system scalability and stability
- Leverage **AI-assisted testing tools** for test generation, anomaly detection, and faster coverage
- Identify, document, and track defects with clear reproduction steps
- Collaborate with developers to ensure early detection of issues (shift-left testing)
- Validate deployments and ensure **production readiness**
- Contribute to improving overall **test coverage, reliability, and CI/CD quality gates**

Required Skills

- Strong understanding of **software testing methodologies** (functional, regression, integration, etc.)
- Hands-on experience with **Playwright (mandatory)** or similar modern automation tools
- Experience testing **React / React Native applications**
- Solid understanding of **Node.js and API testing**
- Experience with **MongoDB or similar databases**
- Familiarity with **AWS environments** (basic infra understanding)

Hiring organization

ansrsource

Employment Type

Full-time, Permanent

Job Location

Hybrid in Bangalore

Date posted

July 6, 2026

Experience

2 -3 Years

- Experience with **test case design, debugging, and root cause analysis**

Qualifications

- Experience with **performance testing tools** (e.g., k6, JMeter, Artillery)
- Exposure to **AI-driven testing tools** (e.g., test generation, self-healing tests, anomaly detection)
- Experience with **CI/CD pipelines** (Bitbucket, GitHub Actions, Jenkins, etc.)
- Knowledge of **accessibility testing (a11y)** tools and standards (WCAG)
- Experience with **mobile app testing (React Native)**
- Familiarity with **security and vulnerability testing basics**
- Understanding of **cloud-native architectures and distributed systems**

What We're Looking For

- Strong analytical and problem-solving skills
- Ability to think beyond test cases and identify edge cases
- Clear communication and collaboration skills
- Ownership mindset with focus on product quality, not just testing

About Us

ansrsource provides equal employment opportunities to all team members and applicants for employment and prohibits discrimination and harassment of any type without regard to race, color, religion, age, sex, national origin, caste, disability status, genetics, protected veteran status, sexual orientation, gender identity or expression, or any other characteristic protected by federal, state, or local laws. This policy applies to all terms and conditions of employment, including recruiting, hiring, placement, promotion, termination, layoff, recall, transfer, leaves of absence, compensation, and training. We respect and support diverse cultures, backgrounds, talents, and perspectives. We believe embracing diversity and creating an inclusive environment will help us grow and succeed as an organization and better serve learners, who are the ultimate audience for all we create.
